PROFILE

Highly motivated and enthusiastic person with expertise knowledge in Java, HTML, CSS. A passionate coder who thrives on creating engaging and dynamic web applications. Able to efficiently collaborate with teams and clients to achieve project objectives and to deliver stunning solutions for the client objective.

PROJECTS

OD Management System :

- Our project is an od management system where students can able to request od and respected Mentor and HOD can able to provide or reject od of the student.

Sensory detector of hazardous gases in poultry farms :

- This project aims to develop an automatic sensor model for monitoring NH₃ and H₂S gas emissions from bird litter in poultry facilities. It alerts farmers when gas levels exceed safe limits, helping to improve air quality, reduce odors, and control fly populations.

INTERNSHIP

Onestop AI

AUG-23 - SEPT-23

Single Page Website:

- This single-page website presents comprehensive information about our project, showcasing its objectives, features, and benefits in a concise format.

WeatherWise:

- This web application designed to provide current weather information for any city using the OpenWeatherMap API. By entering a city name, users can instantly retrieve real-time data on temperature, weather conditions, humidity, and wind speed, all presented through a clean and intuitive interface built with HTML, CSS, and JavaScript.

CERTIFICATION

- Programming with JavaScript - Meta
- Full Stack Development - GUVI
- Introduction to Networks - CISCO
- Cloud Essentials - Edureka
